Investigating How Urban Heat Impacts Communities

With 80% of the U.S. population living in cities, urban heat islands intersect with the everyday lives of millions of people. Temperatures in urban areas tend to be hotter than rural areas due to the built environment of concrete, roads, and structures that absorb and radiate heat. In this session, we'll explore how urban heat touches our lives through the lenses of ecological, economic, and social perspectives.

Saturday, October 10th, 2026

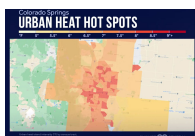

Coronado High School - 1590 W Fillmore St, Colorado Springs 80904

8:30 am – 2:00 pm

Presented by:

Robert Payo and Melissa Rummel - Education Designers - UCAR Center for Science Education

Remember to Bring...

- Your science notebook* pen or pencil.
- Laptop
- Any personal items you may need during the meeting. (the temperature in the building is highly variable)

[NOTE: There will be restroom facilities available.]

* PALS provides a free science notebook at your first meeting of the year!

**SNACKS &
WATER / POP
PROVIDED**

**Bring your own lunch.
(a microwave is available)**

HIGHLIGHTS

- ★ Brainstorm how this topic would lend itself to PBL
- ★ Learn more about the Seal of Climate Literacy endorsement for students
- ★ Share ideas about student-driven solutions and community action
- ★ Explore free SciEd resources
- ★ Teaching Resources
- ★ Door Prizes and/or Teacher Materials

This workshop is made possible by GENEROUS funding from the
The Mikkelson Education Fund...
